

YOUR LEARNER'S COURSE, EXPLAINED

What your members do once they enrol, what they'll see,
and how you can help.

v1.0 · August 2026

THE 60-SECOND VERSION

WHAT IT IS

The NCFE Level 3 Diploma in Gym Instructing and Personal Training — 12 units, studied online on Praxel, with practical sessions in a gym, one of them filmed.

WHO DOES WHAT

PT Launch Lab teaches, marks and awards. Your gym refers members and hosts the practical. Nobody at the gym marks anything.

THE ONE THING TO REMEMBER

If a learner asks you a course question you are not sure about, send them to their tutor — the PT Launch Lab team member who marks their work and confirms the result — rather than guessing. Wrong answers cost them a resubmission.

HOW PRAXEL WORKS

THE LEARNING PLATFORM

Praxel is where the course actually happens — not a portal that links out somewhere else.

ONE SIGN-IN

Learners sign in at ptll.praxel.co.uk with their own account.

EVERYTHING IN ONE PLACE

Units, workbook tasks, tutor feedback and their evidence all live on the same site.

WORKS ON A PHONE

No laptop needed — learners can read, answer and submit from their phone.

Their unit list — every unit, its status, and how much is left to do.

WHAT A LEARNER ACTUALLY DOES

feedback

Next unit

- Units are presented in order, and Praxel prompts them to pick up where they left off — but nothing stops a learner opening a later unit first.
- Every task autosaves as they go, and Praxel warns them before they lose anything unsaved.
- Once a unit is submitted, it sits with their tutor — there's nothing more for the learner to do until feedback lands.
- Feedback can send a unit back for another go. That's normal marking, not a sign anything has gone wrong.

The screenshot shows the PT Launch Lab interface. At the top, there's a navigation bar with links: Dashboard, My course, Mentorship, Library, Feed, Guide, Help. The user is logged in as 'Demo Learner'. The main content area shows 'Unit 3: Supporting Client Health and Well-being' with a progress bar at 2/31. Below the unit title, there's a toggle for 'Plain English' and a button to 'Download blank workbook (Word)'. A section titled 'How to work through this unit' provides instructions: 1. Your work saves itself as you type — you never need to press anything to keep it. 2. Finish a learning outcome, then tick "Mark LO complete" at the end of that section to checkpoint it. Come back any time. 3. Only once every learning outcome is done, use Submit whole unit at the bottom — that sends the unit to your assessor for marking. Below this, it says 'Complete every question. You may fill this in online or download the blank workbook, complete it offline, and upload it.' The main content area is divided into two columns. The left column is titled 'LEARN FIRST - LO1' and features an illustration of a woman running on a treadmill. The right column is titled 'Unit 3 — Supporting Client Health and Well-being' and contains the following text: 'LO1 — Understand Lifestyle and Health Promotion. This section covers the knowledge and understanding required for Learning Outcome 1: exploring the key factors that shape health, national guidelines, and how to communicate healthy choices effectively to clients.' Below this, there are three sections: 'AC 1.1 Factors affecting health and well-being', 'AC 1.2-1.3 National eating and activity guidelines', and 'AC 1.4-1.5'. At the bottom, there's a button 'Submit whole unit — 29 tasks left' and a note 'Your work saves automatically — submit once the whole unit is complete.'

The start of a unit — how-to instructions, a Plain English toggle, and the option to download the workbook to complete offline.

WHAT THEY SEE

A workbook task — answered and saved automatically.

Their progress across all 12 units, at a glance.

Written feedback on a submitted unit — their tutor confirms the result separately.

Handbooks and guides shared by their tutor.

WHAT'S IN THE COURSE

01

Anatomy and Physiology for Exercise

02

Maximising the Customer Experience in a Gym Environment

03

Supporting Client Health and Well-being

04

Conducting Client Consultations and Gym Inductions

05

Planning and Reviewing Gym-Based Exercise Programmes

06

Instructing and Supervising Gym-Based Exercise Programmes

IN THE GYM

07

Applied Anatomy and Physiology for Activity, Health and Fitness

08

Client Motivation and Lifestyle Management

09

Programming Personal Training Sessions

10

Delivering Personal Training Sessions

IN THE GYM · FILMED

11

Nutrition to Support a Physical Activity Programme

12

Business Acumen for Personal Trainers

Units 6 and 10 are the ones that happen on a gym floor. Only unit 10 is filmed — see the next page.

PRACTICALS IN YOUR GYM

UNIT 10 - FILMED

DELIVERING PERSONAL TRAINING SESSIONS

Their tutor watches your member deliver a real personal training session to a real client, on video — one continuous recording or several shorter clips that together cover the whole session: warm-up, main session, cool-down and their coaching points. Up to 10 clips, 90 minutes in total. Alongside it, they upload a programme card — exercises, sets, reps, intensities and progressions — matching what their tutor sees them deliver on camera.

UNIT 6 - NOT FILMED

INSTRUCTING AND SUPERVISING GYM-BASED EXERCISE PROGRAMMES

Your member also delivers a real session to a real client for this unit — there's just no video uploaded for it. What they submit is a programme card: exercises, sets, reps, intensities and progressions, matching the session they were observed delivering.

WHAT YOUR GYM NEEDS TO PROVIDE

Floor space applies either way. The other three are filming logistics for unit 10 — they don't apply to unit 6.

- **Floor space and equipment.** Whatever the session plan calls for, at a time when that space can actually be used.
- **A real client.** A willing participant, not a friend miming the exercises — and they should know they're being filmed and why.
- **Other members out of frame.** A phone on a tripod pointing at one station is usually enough; a busy walkway behind the client is not.
- **Quiet enough to hear.** Their tutor has to hear the coaching. Loud background music and a cue shouted across the gym floor lose more submissions than a bad camera angle.

Filming basics for unit 10: landscape, both trainer and client clearly visible in shot, coaching cues audible throughout.

Both units are marked by their PT Launch Lab tutor from what's uploaded — the video and programme card for unit 10, the programme card for unit 6. Nobody at the gym assesses or signs anything off.

WHERE YOU FIT

YOU GENUINELY HELP BY

- Telling members about the course and referring the ones it suits.
- Providing space and equipment for the practical.
- Finding a willing client.
- Giving them somewhere quiet to film.
- Asking how it is going.
- Telling us when someone has gone quiet or is struggling.
- Reminding them their tutor answers questions fastest.

PLEASE LEAVE TO US

- Teaching the course content or coaching them through their answers.
- Marking, checking or approving work.
- Signing anything off.
- Completing or correcting a learner's tasks.
- Promising an interview, a job or a placement.

Your agreement makes the gym a referral and distribution partner. That is the whole of it – and it is genuinely useful.
