SOUND FAMILIAR?

You want to work in fitness. You just can't see how to get there.

You're in a job that isn't you

Sunday evenings feel heavy. The work pays the bills, but it doesn't give you much back. You keep telling yourself you'll change it next year.

Fitness is the best part of your week

You train. You read about it. Friends ask you for advice. You already know you'd enjoy coaching people. You just don't have the qualification.

You can't stop earning to retrain

Rent and bills don't pause while you study. A full-time course, or weeks off work, isn't an option.

The way out

You don't have to quit to qualify. You study online, in the evenings and at weekends, and you keep your wage while you do it. Most learners qualify in **8–16 weeks**.

When you qualify, **we introduce you to a gym**. That is the whole idea, and the rest of this prospectus explains how it works.

HOW IT WORKS

Four steps, from your current job to a gym floor.

01

LEARN

Study online, at your own pace

The course runs on Praxel, our learning platform. You study when it suits you, around work and family. Your personal tutor is assigned within 24 hours of enrolling and is there for your questions all the way through.

02

QUALIFY

Practicals filmed at any gym

The practical assessments are video-assessed. You film yourself coaching at any gym, and a tutor reviews it. There's no in-person training and nothing to travel to. You finish with the NCFE Level 2 & 3.

03

GET INTO A GYM

A guaranteed warm introduction

Once you qualify, we approach at least one gym on your behalf: one in our partner network, or one local to you. It's a warm introduction, not a job-board listing. Whether they interview you, and whether you get the job, is their call. We've hired 500+ PTs ourselves, so we know what gyms look for and we prepare you for it.

04

BUILD

The Mentorship Hub

Included in the fee. A private dashboard built to walk you from qualifying to your first paying client, with Callum, Miles and Ryan a message away when you're stuck.

Highly recommend using PT Launch Lab. I work full time on a busy schedule, but they allowed me to complete the coursework and learn in my own time. I had the support and knowledge every step of the way from Cal. I am now a qualified Level 3 Personal Trainer and I couldn't have done it without the team!

Michelle · Level 3 Personal Training

From start to finish, the course was structured, supportive, and everything I needed to make the career change I'd been putting off for years. Couldn't be happier with the experience.

Rachel Waldock · Level 2 & Level 3 PT

The support I received was second to none. After having my baby, I thought I'd struggle to find the time — but Callum and the team were so supportive and helpful every step of the way.

Rebecca Davies · Level 3 Personal Training

Fantastic from start to finish. The support didn't stop once I qualified — they've continued to offer guidance and help that's been invaluable as I build my business.

Matthew Bell · Level 3 Personal Training
